Privacy and Security on the Public Site

CarePartners of Connecticut (“we”, “us” or “our”) understands that privacy of information is of great importance to our members and the people that visit our site. We want you to know that CarePartners of Connecticut does not sell information obtained through use of this website to anyone. In addition, we have established the following privacy and security practices with respect to the public portions of www.carepartnersct.com.

Because we want www.carepartnersct.com to better serve visitors’ needs, we collect some basic information about visitors’ computers, including:

- Operation System (e.g., Windows Vista)
- Browser Software (e.g., Microsoft Internet Explorer, Firefox)
- Internet Service Provider (e.g., AOL)
- Geographic location (e.g., Hartford, Connecticut)

The information we collect about our visitors’ computers will not be used to identify individuals. Instead, we check which webpages and services people use while they are here. For example, we use the browser information to help us design our website so that as many people as possible will be able to view the pages correctly. In short, it helps us determine what parts of the site people like and what parts they don’t, so that we can add information appropriately.

Privacy and Security on the Secured Sites

The sections of www.carepartnersct.com that are password protected and require individuals to register and log in contain protected health information (PHI) and allow individuals to perform certain transactions (e.g., order an ID card, change a PCP). Because of this, CarePartners of Connecticut must be able to link a user's activity back to their identity. For example, when a member changes her PCP, we must be able to make that change within our systems and we cannot do that without linking the information back to the member. In addition, it is important for CarePartners of Connecticut to keep track of what functionality a member uses. Therefore, in the password protected portion of our website CarePartners of Connecticut does collect identifiable information about users. This includes information about the user's computer as listed above, and information related to the user, such as pages visited and PHI submitted or changed.

The confidentiality, integrity and availability of your PHI are important to CarePartners of Connecticut. To protect against unauthorized access to PHI that is accessible on the password-protected portions of our site, CarePartners of Connecticut has adopted stringent security standards. Data transmitted between your browser and the password-protected portions of carepartnersct.com is protected by 128-bit encryption.

PHI that CarePartners of Connecticut collects from users on the password-protected portions of carepartnersct.com is confidential. All PHI CarePartners of Connecticut has regarding our members is available only to authorized users and is protected from unauthorized access by multiple layers of security controls and monitoring. In addition, PHI that is collected and maintained by CarePartners of Connecticut is used and disclosed only in accordance with our [Notice of Privacy Practices](#).

We collect email addresses as part of the registration process. We will use email addresses to notify registrants of online activity related to the security and privacy of their accounts, such as retrievals of username, etc. In addition, we will use email addresses to send prospective and current members health and wellness information, benefit and product information, and other updates that might be of interest to them as prospective and current members of CarePartners of Connecticut. Each time we send health and wellness information, benefit and product information, and other updates, the recipient will be given the opportunity to opt out of receiving similar emails in the future. Please note that registrants cannot opt out of receiving emails that notify them of online activity because these are necessary to protect the privacy and security of web accounts.
